Upon further consideration, the indicated allowability of some claims has been withdrawn.

Claims 23-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims depend from claim 22, which has been canceled.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15 & 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Tipple et al 4,958,758 (newly cited).

Tipple shows a wrist strap including a padded layer 24 (figure 4), non-stretchable layer 28, and third layer 42.

Although Tipple does not disclose that this strap is for use with a bow string release, it includes all structure claimed and could be used for this purpose with no structural change.

Claims 18 & 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Summers et al 5,937,841 (of record).

Summers shows a strap for a bow string release having a buckle 16 with a pin at a first end, and a series of holes 14 to receive the pin at a second end. When the pin is engaged with the middle hole, the strap is considered to be in a "semi-closed relationship". The first end may be completely removed from the second end.
